SUMMARY

Software testing professional with extensive experience in automation and manual testing brings a passion for enhancing software quality to contribute to innovative technology solutions. Proven expertise in leveraging tools like Selenium, Python, and Unittest to optimize testing frameworks while fostering collaboration and knowledge sharing within teams. Ambitious about delivering superior software through meticulous test execution and process improvement, aligning with the mission to advance reliable and cutting-edge products.

EXPERIENCE

Operations Test Analyst III

JT4 LLC   📅 09/2022 - Present   📍 Ridgecrest

- Implement Automation Testing Framework using selenium, python and unittest
- Document, update, and improve the Test Processes and Test Procedures
- Analyze the requirements, explore the system to understand the software, and provide feedback to developers
- Plan, organize, schedule and track the activities of the Test Execution phase of the software development life cycle to provide management with information about the quality of the software
- Distribute the test assignments among test teammates and track completion
- Create, update, execute, and document Automation and Manual Test Procedure/Cases based upon the Requirements, Design and CR documentation utilizing the Test Management tool, Helix ALM
- Provide traceability of Test Procedure/Cases to the Requirements, Design and CR documentation utilizing the Test Management tool, Helix ALM
- Report and track defects utilizing the Test Management tool, GIT
- Provide training to new team members on processes, tools, unittest, selenium, python

Operations Test Analyst II

JT4 LLC   📅 12/2018 - 09/2022   📍 Ridgecrest

- Document, update, and improve the Test Processes and Test Procedures
- Analyze the requirements, explore the system to understand the software, and provide feedback to developers
- Plan, organize, schedule and track the activities of the Test Execution phase of the software development cycle to provide management with information about the quality of the software
- Create, update, execute, and document Manual Test Procedure/Cases based upon the Exodus Data Warehouse Software Test and Evaluation procedures, Requirements, Design and CR documentation utilizing the Test Management tool, Helix ALM
- Provide traceability of Test Procedure/Cases to the Requirements, Design and CR documentation utilizing the Test Management tool, Helix ALM
- Report and track defects utilizing the Test Management tool, GIT
- Provide training to new team members on processes and tools

Software Test Engineer I

JT3 LLC   📅 10/2014 - 12/2018   📍 Ridgecrest

- Document, update, and improve the Test Processes and Test Procedures
- Analyze the requirements, explore the system to understand the software, and provide feedback to developers
- Plan, schedule and conduct the test execution phase of the software development cycle to provide management with information about the quality of the software
- Create, update, execute, and document manual Test Procedure/Cases based upon the Exodus Data Warehouse Software Test and Evaluation Procedures, Requirements, Design and CR documentation utilizing the Test Management tool, JAMA
- Provide traceability of Test Procedure/Cases to the Requirements, Design and CR documentation utilizing the Test Management tool, JAMA and Excel
- Report and track defects utilizing the Test Management tool, JAMA
- Provide training to new team members on processes and tools

CERTIFICATION

Java Back End Coding Certificate
Promineo Tech 1/2024

Full Stack Web Development Certificate
University of California Berkeley Extension 1/2021

Certified Tester Advanced Level Test Analyst (CTAL-TA)
International Software Testing Qualifications Board (ISQB) 6/2014

Certified Tester Foundation Level (CTFL)
International Software Testing Qualifications Board (ISQB) 10/2010

Certified International Software Configuration Manager
International Society of Configuration Management 11/2009

EDUCATION

Bachelors of Information Technology in Computer Systems
American InterContinental University
📅 01/2005

Associates of Arts in Liberal Arts 2000
Cerro Coco Community College
📅 06/2000

High School Diploma
Burroughs High School
📅 06/1997

SKILLS

Automation Testing | Bootstrap | CSS

Data Quality | Excel | express.js | GIT

Helix ALM | HTML | JAMA | Java

Javascript | JQuery | Json | Maven

MySQL | node.js | Python | Postman

Quality Assurance | react.js | rest api

SDLC | Selenium | Springboot

Unittest

EXPERIENCE

Software Tester / CM - Aero Engineer - Field

Wyle Laboratories   🗓 10/2007 - 10/2014   📍 Ridgecrest

- Create, update, execute, and document manual Test Procedure/Cases based upon the Exodus Data Warehouse Software Test and Evaluation Procedures, Requirements, Design and CR documentation utilizing the Test Management tool, Excel
- Report and track defects utilizing the Test Management tool, Excel
- Create/update/modify Customer Requests (CR's)
- Provide Configuration Management (CM) reports
- Conduct CMB/SCMB meeting utilizing the CM tool, Test Track Pro
- Provide team members with needed testing updates, test cases, other testing/process information, and additional support where needed

Data Productions Analyst

Wyle Laboratories   🗓 02/2007 - 10/2007   📍 Ridgecrest

- Provide customer support on various data products and data reduction of flight and range data utilizing Omega 3000 System, VMS, and UNIX systems, and processing analysis programs within the required time restraints
- Duplicate and provide customers with Flight Data, to include quality assurance, labeling, storing, and utilizing the Exodus Data Warehouse software (DWFE and DEAMS)
- Utilized specialized software programs to extract requested flight data on DRSU001 and DRSU002 (UNIX platform) using Windows PCs
- Assist in the operation of the flight data digitizing systems to verify data quality
- Generate Data Discrepancy Reports on all problems encountered in the processing of the data tapes and forward the reports electronically, via email, to the appropriate Flight Test Engineer and aircraft instrumentation personnel
- Track and maintain all data requests utilizing the Flight Data Reduction Status Database (FDRSDB)
- Degaussing tapes when approved by designated representative

Technical Analyst

Wyle Laboratories   🗓 09/2005 - 02/2007   📍 Ridgecrest

- Managed the Legacy Allow Reconnects and Disconnects process for the entire user base at NAWC
- Maintained SSAA accredited list of IP legacy system as verification
- Provided team members with information needed to rogue hunt and perform scan
- Utilized Helpdesk Expert Automation Tool
- Provided Legacy reports based on the "allow list", the "reconnect list", and the SSAA accredited list
- Verified and approved Computer Usage section of Cooperative Research and Development Agreements (CRADA) on behalf of the Information Assurance Manager
- Administrative Assistance
